### ABOUT ME

I'm a web developer with over 3 years of experience specializing in React.js, Next.js, and TypeScript for modern UIs. On the backend, I build efficient APIs with Golang and Node.js, using PostgreSQL & MongoDB. I also leverage AI tools like OpenAI and Cursor AI to boost productivity.

### WORK EXPERIENCE

#### Front-End Developer (Full-Time)

**Vatan Soft**

**06/2023-12/2024**

- Updated packages and refactored a React application, modernizing its structure and functionality.
- Integrated the latest state management technologies, including React Redux, to enhance application performance.
- Collaborated with cross-functional teams to implement new features and optimize existing ones, improving overall user experience.

#### Full-Stack Developer (Part-Time)

**11/2024-02/2025**

**Teamfluencer**

- Frontend Development: Building web applications with React.js and optimizing websites using Next.js for SEO.
- I developed a Stripe integration with Node.js and implemented various enhancements to improve the payment flow.

#### Full-Stack Developer

**Freelance Projects**

**04.2022-Present**

I develop modern web applications, creating user-friendly and sustainable systems with React and Next.js on the frontend, and Node.js and Golang on the backend. I also handle deployment processes with CI/CD integration.

#### Technologies & Tools

- Frontend Development: Building web applications with React.js and optimizing websites using Next.js for SEO.
- State Management: Implementing Redux Toolkit and useContext based on application requirements.
- Backend & Databases: Developing server-side solutions with Golang and Node.js (Express.js), utilizing MongoDB and PostgreSQL.
